WASHINGTON CITY.

GOVERNOR FOSTER NOMINATED FOR SECRETARY OF THE TREASURY.

To Break Down the Foraker, Sherman and McKinley Influence in Ohio-The

Letter a Western Senator Beceived, WASHINGTON, February 21.—The Presi-

dent to-day sent to the Senate the nomion of Hon. Charles Foster, of Ohio, to be Secretary of the Treasury vice William Windom, deceased. For more than a week it has been believed by quite a number of the best-posted people here that Mr. Foster would be the next Secretary. Just a week ago to-day the Inspatch had a special teleam stating positively that the President gram stating positively that the President at the Cabinet meeting announced to his advisers that he had decided to tender the position to Mr. Foster and that the latter had been so informed. Persons opposed to the ex-Governor's selection denied the story, and they worked hard to induce the President to change his mind, but to no avail. The nomination would have been sent in before this but for the deaths of Admiral Porter and General Sherman. It was thought last night that it might not go in until Tuesday, but the source of information was so straight and strong that in this correspondence for more than a week past, it will be remembered, the chances of Mr. Foster were placed ahead of those of any other aspirant. other aspirant.

AS A FOLITICAL MOVE.

From a political standpoint the President has done a wise thing. His Administration needed another politician in the Cabinet. It had not one save Mr. Blaine. Tracy, Proctor, Wanamaker, Noble, Miller, and Rust are not men of influence. Mr. Blaine is in too small a department to manipulate things; besides he is the most popular of all the Republicans, and he may be nominated himself, provided he will take the nomination. His friends say he will not: that he prefers to stay in the Cabinet and run Harrison. With the powerful influence of the Treasury Department Foster, if he favors Harrison's renomination, can break down the influence of Sherman, McKinley, and Foraker in Ohio and carry that delegation for Harrison. AS A POLITICAL MOVE. AN IDLE THREAT.

The latter is undoubtedly a candidate or renomination. He said in a fit of anger of long ago that if the force bill was dested he would decline to be a candidate. not long ago that if the force bill was de-feated he would decline to be a candidate. But he did not expect the threat would get before the public. That was an idle threat. Benjamin Harrison is going in to win, and though he is un-popular he can with patronage at his dis-posal bring about his own renomination if Blaine keeps his hands off. Blaine can have the nomination if he should enter the probably knows it.

AN ANT-SILVES MAN. AN ANTI-SILVER MAN.

ANANTI-SILVER MAN.

Foster is an anti-silver man. He believes in the gold standard and will be specially acceptable to the Wall-street ring who dictate the financial policy of the Government and who want to keep down the South and West. The silver senators among the Republicans will not like the selection, but they will have to stand it. There is probably no question about confirmation. Common courtesy demands confirmation. The selection is in keeping with a gold standard administration, and will tend to intensify the demand in the West and South for the free coinage of silver according to the opinions expressed here to-day by representative men from those sections. A QUEER LETTER.

Some of the public men here receive queer letters. Below will be found one that was not long since in the mail of a Democratic senator. It is given just as it was written, without punctuation points. It seems to be a genuine production, and from a person whose Democratic father became much alarmed over the attempt of "Granny" Hoar and other Radicals to pass the force bill. The Senator who received the letter did not care to have his name used. The epistle is as follows:

THE BOANGER BUILDING.

The time is almost up for action on the Roanoke public building. The President has not yet signified whether he would sign the bill. Representative Edmunds has called twice on the President in the interest of the bill, and if the bill is lost it will not be his fault. It may be that Mr. Harrison will allow the bill to become a law without his signature. law without his signature.

There were turbulent times in the House again to-day and the Republicans hooted and yelled like Comanche Indians. It was a lively and exciting scene.

The Acting Secretary of the Treasury to-day sent to the House a letter recommending an additional appropriation of \$5,000 for paper for internal-revenue stamps for the current fiscal year, owing to the increased demand for stamps, caused by increased business and the new kind of stamp provided by the last tariff bill and the reduction in the tobacco tax.

here a distinct advantage. Less common,
less in keeping of the overcrowded poor,
less handled and soiled, therefore they
may perhaps in many cases run their circuit without having done much mischief.

There are, indeed, preservative circumstances which guardate sanatary credit of
all paper currency. One is the very freedom of circulation and the ventilation this
insures. Smoothness of surface is another,
and a third, which operates in a minor
degree, is found in the fact that adults—not
children—are chiefly concerned in the business of exchange. These qualifications
may suffice to justify, at least by a negative verdict, the employment of paper
money from a sanitary standpoint.

Still a certain risk remains, and careful
persons will do well to note this and on
occasion to disinfect even their bank-notes.
The danger, such as it is, should also, in
our opinion, be allowed some weight in deciding the question whether a small-note
currency, hitherto not found to be indispensable, should or should not be generally
adopted.

From a business standpoint a circus is always a source of profit to the town in which it exhibits. It takes money away, of course, but it spends a good sum in license-tax, supplies, hotel bills, etc., and it draws a large crowd of people, who on an average spend three or four times as much with the merchants as they do with the circus. THE NICATAGUA CANAL RILL.

The Nicaragua canal bill was taken up as unfinished business, and Mr. Morgan addressed the Senate in defence of the bill and in reply to the arguments made against it yesterday.

Mr. Edmunds, referring to a misunderstanding as to the amount of capital stock subscribed for by the construction company (it appearing in the committee's report as a hundred millions) said that he had a telegram from Mr. Hitchcock, the president of the company, saying that that was a misprint for one million dollars. A Wise Man.—The deadlock in the Common Council was broken last night by the absence of Colonel Taylor. The Colonel couldn't help being absent. Some of the boys had him out in the suburbs under a tree with a rope around his neck. It was either hang or break the combination, and the Colonel decided to help break it. We want to say right here and now that if there is any more "fussing" in the Council we will move to impeach the whole gang and if we can't get 'em impeached we'll THE CLATTON-BULWER TREATY.

THE CLATION-BULWER TREATY.

Commenting on Mr. Vest's argument as to the obstacle presented by the Clayton-Bulwer treaty, Mr. Morgan asked whether senators were to take off their hats to Queen Victoria and say: "By the leave of your Majesty"? That, he said, was not the American view of the question. It had not been so since the days of President Monroe and never would be. Not a move had ever been made in the Senate in the direction which the oill simed at that had not been met by the threat of the Clayton-Bulwer treaty. He was tired of it all. The threat of the Clayton-Bulwer treaty was a nightmare. And, as to the subsidy of \$190,000,000, that argument was totally irrelevant, because the United States would never have to pay a dollar of it.

18 THE TREATY OBSOLETE?

Mr. Gray called Mr. Morgan's attention Council we will move to impeace the water gang and if we can't get 'em impeached we'll head a body of outraged citizens and clean 'em out to a man. We've got tired of his capers and we now give him due notice that unless he comes to a right-about face we'll give him dead away and rid the community of his presence. IS THE TREATY OBSOLETE?

Mr. Gray called Mr. Morgan's attention to a letter written by Mr. Blaine in November, 1881, while Secretary of State, to Mr. Lowell, Minister at London, proposing a modification of the Clayton-Bulwer treaty. It would seem, he said, a recognition of the binding force of that treaty at that time and it could not be overlooked now. He would, therefore, like Mr. Morgan to teste the grounds on which the Committee dead away and rid the community of appresence. An individual about his size is wanted in one of the eastern States for cow stealing, and while we don't want to be pizen mean we owe a duty to this community. We have got our eyes on the Mayor. On numerous occasions within the last three months you have been drunk, and you can be found in state the grounds on which the Committee on Foreign Relations held that the treaty was obsolete.

THE TREATT REPUDIATED.

Mr. Morgan's reply was to the effect that the bill did not infract any of the conditions of the treaty. In fact, the bill was a substantial compliance with the exactions of the treaty, which were to secure canal transit across the Isthmas. He declined to have any controversy with any senator as to whether the Clayton-Bulwer treaty was in force or not. It was a side issue which had nothing to do with the bill. If you want to cult the wild cactus when the spring-time comes again, Thomas, we have pointed out the way. If you don't the boys will cull you. Mr. Vest, referring to an allusion of Mr. Morgan to "railroad influence" as being behind the opposition to the bill, repudiated the insinuation and said that it was the idle vaporing of a man who considered his own judgment infallible. He thereupon decided to take other steps. This, however, did not prevent him—as proof that he had no religious prejudices—from handling to the Chief of the Holy Synod, M. de Pobiedonoslzew, a witter for now for the orthodox Russian prejudices—from handing to the Chief of the Holy Synod, M. do Pobiedonoslzew, a gift of £40,000 for the orthodox Russian schools. It may not be uninteresting to the Heraid's readers to know that generally in Russia—as it was in many other coun-tries of Europe till a few years ago—Jews are no longer allowed to farm or till land, and this, with their increasing population, was one of the principal causes of their poverty. WILL BE CONSIDERED.

The citizens of this place are very much The citizens of this place are very fluch agitated over a proposed amendment to the city charter enabling the city to increase its bonded indebtedness to \$500,000. Much is being said on both sides, and the question will be fully considered at a massmeeting of all the citizens to be held in the Opera-House Monday night.

A GOOD MOVE.

A literary and library association composed of the leading citizens of the place has just been organized here with Dr. George W. Graham, president; E. D. Latta, vice-president; and John M. Walker, Jr., secretary and treasurer. The association has about thirty-five members to begin with. Their report being favorable, a further important sum will be provided by Baron de Hirsch for the purpose of enabling Russian Jews to emigrate to that country, and for the purchase of land there for their benefit. [Correspondence of the Richmond Dispatch.] Scotland Neck, N. C., February 21.—The Inferior Court for this county closed yesterday. ALITTLE ORPHAN.

Mr. Noah Biggs this week took from the Baptist Orphanage at Thomasville a little orphan boy, whom he will rear and prepare for business. Mr. Biggs feels a special interest in the work, as he has put considerable money in the orphanage. The enclosed circular is being sent to engineers (civil, mechanical, electrical, and mining) in the State. You can help very much towards the formation of this society if you will publish the circular. Engineers who have not received the circular, but who see the notice in your paper, are respectfully requested to communicate with me. Barstot., Tenn. February 21.—Judge Morrison, of Scott county, Va., has appointed A. B. Harris, of New York, receiver of the Chicago, Cincinnati and Charleston railroad. A suit was brought by Newman Erb and others to recover an indebtedness of \$200,000. of \$200,000.

Chancellor Smith has appointed a receiver for the Tennessee portion of the road, Judge Bond for the South Carolina portion, and proceedings have been instituted in Kentucky. JAMES H. FITTS.

Shot by Mistake for His Uncle.

[By telegraph to the Dispatch.]

Jackson, Miss., February 21.—Albert

Hitt, the fifteen-year-old son of a prominent planter of this county, was shot and
killed last night while eating supper at the
table of his uncle. Dr. Lamb. The escape
of the other members of the tamily was almost miraculous. The bullets are supposed
to have been intended for Dr. Lamb. The
murderer escaped. Dear Sir.—In many States of the Union engineering societies exist, whose meetings for the purpose of reading papers and discussing engineering topics prove of much value to the members. A society of engineers should be organized in this State. Its members would be benefited in many ways—by the discussion of subjects of interest, by exchanging publications with kindred societies, by becoming acquainted with others of the profession throughout the State, and enjoying the pleasant social relations which will thus be brought about.

You are respectfully requested to return the enclosed sheet with blanks filled out. Address

Blacksburg, Va. FINDLAY, Onto, February 21.—At 1 o'clock this morning lightning struck a nitro-glycerine magazine on the Stoker farm, three miles northwest of the city, in which was stored fifty cans of the explosive. The only thing left to indicate the place of the magazine is a hole in the ground big enough to burv a three-story house in. The loss is not great.

Do you favor the formation of a society of engineers in the State of Virginia? Where can you meet in order to organize the society? Name places in order of preference? What date would be convenient to you? Name dates in order of preference?

Charged with the Tunnel Disaster.

(By telegraph to the Dispatch.)

New York, February 21.—Engineer Lewis
Fowler and William McManus, the signal
operator at Seventy-second street on the
New York Central road, who are charged
with having caused yesterday's disaster in
the Fourth-Avenue tunnel, were arraigned
before the Coroner to-day and held in
\$10,000 bail each to await the inquest on
Tuesday next. An Inquisitive Scal.

Seals occasionally paddle into New York bay and up through the Narrows to take a look at the great city of New York, but it is an uncommon thing for them to climb out of the water to get a land view, says the Times. Those that prove themselves exceptions to this rule generally come to grief. A big fellow, four feet six inches in length and thirty-eight inches bust measure, started on Saturday on a land-oxploring expedition near Fort Wadsworth. It had not made much progress inland before a Staten-Island youth, Albert Nichols, caught sight of it, and as Albert was much swifter of foot than the seal was of fin—at least on land—he soon came up with it. For a fourteen-year-old boy to capture alive a seal nearly as tall as himself is no light task. Albert believes, however, that he would have succeeded had not a boatman, William Giles, believed otherwise. Giles went for an axe, and when he found one smashed in the seal's skull so that it died with that look of forgiveness in its large, mournful eyes that all seals assume when being persecuted by cruel man. The body of the unfortunate explorer was put on exhibition at the quarantine dock, and its skin will be preserved by Albert as a trophy. Failure in the Furniture Trade.
